SUMMARY

Dynamic DevOps Engineer with over 6 years of experience enhancing cloud infrastructure and automating deployments. Skilled in AWS, Kubernetes, and scripting for efficient operations. Successfully led a major cloud migration achieving 30% reduction in deployment times.

EXPERIENCE

DevOps Engineer

ClearSky Technologies

01/2025 - Present Philadelphia, Pennsylvania

- Led the transition to AWS cloud services, reducing deployment time by 30% through automation and optimization.
- Implemented CI/CD pipelines using Jenkins and Docker, increasing deployment efficiency by 40% in the last year.
- Collaborated with development teams to integrate Terraform for infrastructure as code, enhancing scalability and reliability.
- Monitored and improved system performance, averting 98% of potential outages with proactive resolutions.
- Conducted security audits and implemented improvements, achieving a 25% enhancement in data protection measures.

Cloud Infrastructure Engineer

IntraWorld Systems

06/2022 - 12/2024 Philadelphia, Pennsylvania

- Developed automated deployment scripts that reduced manual operational workloads by 50% using Python and Bash.
- Managed Kubernetes clusters for production environments, achieving 99.95% uptime and efficient resource use.
- Collaborated with IT teams to refine agile workflows, resulting in a 20% improvement in project turnaround times.
- Enhanced system monitoring with Grafana, leading to a 30% increase in issue resolution speed and accuracy.

Systems Engineer

TechBridge Inc.

02/2020 - 05/2022 Philadelphia, Pennsylvania

- Designed and maintained infrastructure solutions for client projects, increasing overall delivery efficiency by 25%.
- Played a key role in migrating on-premise applications to cloud-based solutions, reducing costs by 20%.
- Improved team collaboration and communication with agile processes, enhancing project delivery times by 15%.
- Implemented security best practices, leading to a 30% reduction in system vulnerabilities over two years.

PROJECTS

OpenSource Cloud Migration Toolkit

Developed a toolkit for seamless cloud migration processes, facilitating easier transitions. GitHub: github.com/victoriabaker/cloud-migration

CI/CD Pipeline Enhancer

Created scripts to enhance CI/CD pipeline efficiency, improving deployment speeds significantly. GitHub: github.com/victoriabaker/cicd-enhancer

EDUCATION

Bachelor of Science in Computer Science

University of Pennsylvania

01/2016 - 01/2020 Philadelphia, Pennsylvania

KEY ACHIEVEMENTS

AWS Cloud Migration Leader

Led a successful cloud migration project, cutting costs by 20% and achieving 30% faster deployment cycles.

CI/CD Implementation Lead

Spearheaded a CI/CD pipeline automation project that increased deployment frequency by 40% with reduced errors.

Security Enhancement Champion

Implemented security measures that reduced system vulnerabilities by 30% over two years, protecting client data.
