Phoenix, Arizona

SKILLS

Node.js · Express · MongoDB ·
PostgreSQL · AWS ·
Microservices Architecture

EDUCATION

Arizona State University
Bachelor of Science in Computer
Science
Tempe, Arizona 01/2016 - 01/2019

KEY ACHIEVEMENTS

- Enhanced Application Performance**
Boosted application performance by 35% through strategic database optimization and backend service enhancements.
- Led Successful Microservices Migration**
Directed a cross-functional team for a successful microservices migration, reducing downtime and improving service deployment by 30%.
- Reduced System Downtime**
Achieved a 40% reduction in system downtime by implementing advanced monitoring and logging tools.
- Optimized Server Efficiency**
Implemented performance tuning measures across multiple services, increasing server efficiency by 25%.

ZOE THOMPSON

BACKEND ENGINEER | MICROSERVICES |
CLOUD SERVICES

SUMMARY

Backend Engineer with 7 years of experience, specializing in Node.js and AWS, adept at developing scalable microservices. Known for strong problem-solving skills and collaborative approach, contributing to a 30% increase in system efficiency. Passionate about enhancing e-commerce technology through innovative software solutions.

EXPERIENCE

Innovative Tech Solutions Remote + Austin, Texas
Backend Engineer 01/2023 - Present

- Developed and maintained scalable backend services using Node.js and Express, increasing service reliability by 35%.
- Designed and optimized databases using MongoDB and PostgreSQL, improving data retrieval times by 20%.
- Collaborated with front-end teams to deliver high-performance RESTful APIs, enhancing user experience and API speed by 25%.
- Implemented security protocols and data protection measures, reducing potential breaches by 40%.
- Participated in code reviews and contributed to continuous process improvements, enhancing team productivity by 15%.

TechWave Solutions Austin, Texas
Backend Developer 06/2020 - 12/2022

- Led a team to migrate services to a microservices architecture, reducing system downtime by 30%.
- Improved server-side processes' efficiency by conducting performance tuning and monitoring, resulting in a 25% speed increase.
- Collaborated effectively with DevOps and front-end engineers to ensure seamless CI/CD using AWS, decreasing deployment time by 15%.
- Utilized communication and problem-solving skills to troubleshoot and resolve complex production issues, minimizing bug-related delays by 40%.

Phoenix Web Technologies Phoenix, Arizona
Software Engineer 06/2019 - 05/2020

- Engineered backend components for a client-facing e-commerce application, boosting transaction speeds by 20%.
- Designed databases and implemented schemas in PostgreSQL, optimizing storage efficiency by 18%.
- Participated in Agile development cycles to refine existing processes, contributing to a deployment frequency increase by 10%.
- Engaged with cross-functional teams to ensure integration consistency, enhancing collaborative workflows by 25%.

PROJECTS

DataStream API Framework

Created an API framework for streaming data using Node.js, enhancing real-time processing capabilities for clients. github.com/DataStreamAPI

PROJECTS

SecureStore E-commerce Microservices

Developed microservices for an e-commerce platform to improve security and scalability. github.com/SecureStoreMicroservices
